

Take a Walk: Data Collection

What surrounds us?

Predict:	
Make a list of what you think surrounds your school, based on your prior knowledge:	

Walk and Observe:	
As you walk (or virtually explore Google Earth), make a list or draw what you see: <i>Example: 3 blocks paved with sidewalks, non-native trees planted every 10 feet on median, 4 apartment buildings.</i>	

Reflect:	
“Sequestration” means to remove or isolate. If natural green areas sequester carbon from the atmosphere, how efficient do you think the area around your school is in “sequestering” carbon? Use your observations and data as evidence:
