

Stations Notetaker

The following notetaker can be used for direct instruction or self-guided learning stations:

Guiding question:	Take notes on your learning to answer your question:
<p>What is energy?</p> <p>What are the different types of energy?</p> <p>What are some key points about energy in Hawaii?</p> <p>What is the journey, from source to switch?</p>	

Challenge question: *Based on what you learned above, what do you think the relationship between the human population and energy use is? What kind of impact on the environment do you think this has?*

NGSS MS-ESS3-4 Construct an argument supported by evidence for how increases in human population and per-capita consumption of natural resources impact Earth's systems.

CCSS.ELA-LITERACY.W.8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
