

How to use the Climate Action Project Plan

A guide to navigating the Educator Toolkit for *A Climate for Change*

Key to the Climate Action Project Planner:

PROJECT OVERVIEW

The Project Overview is a 1-page document that outlines:

- The essential question for the project
- What students will do
- Key skills and content standards
- Key vocabulary

Inspired by the film: In this box, you will find a short synopsis of the clip from *A Climate for Change* that is the source of inspiration for a particular project.

***Highlighted PBL point:** *Anytime you see this type of box, pause and read what it says. These are highlighted instructional points to make your Project-Based Learning journey smooth, whether you are brand new or an expert in implementing PBL.*

Title of the Learning Moment. These are the guiding questions that students will explore and try to answer in this learning moment.

In this section, you will see ideas for activities and scaffolds that will support students in completing this learning moment. You can modify these to work for you and your students!

What to collect from students: This is just a reminder of what types of artifacts, formative and summative, students are completing or creating during this Learning Moment.

Type of assessment: Formative or Summative? It will say in this section.

Skills and content: The skills and content listed here come directly from the Skills & Content/Standards set up for this project. They should also align to your rubric(s) for Standards-Based Grading.
