Project Reflection

Now that the project is complete, how would you answer the EQ?

Think back to the film clip from *A Climate for Change.* What did we learn from the story in the film and how did that connect back to your project?

What are you most proud of accomplishing during this project?

What was the most challenging component of this project?

When you presented your final product, what kind of feedback and questions did your audience ask you? What did you learn from this?

What is your biggest takeaway about your role in combating Climate Change?
